Raúl Alejandro Pérez Saucedo

raulpzs@outlook.com linkedin.com/in/raulpzs medium.com/@raulpzs raulpzs.github.io

Data scientist working on AI for public good, with experience in machine learning, statistical modeling, and data infrastructure for legal and public-interest research. Fluent in English and Spanish.

Education

Tecnológico de Monterrey (ITESM) **August 2021 - June 2025**

B.S. in Data Science and Mathematics Engineering *Monterrey, Mexico*

- GPA of 94/100. Awarded Academic Excellence.
- Member in: STEM Outreach Club (President) and Consulting Club.

Experience

The Carter Center **June 2025 - current**

Contractor, AI and Legal Researcher *Atlanta, GA*

- Built and compared a two-stage LLM pipeline (labeling, then retrieval-based verification) and a fine-tuned LEGAL-BERT pipeline for coding freedom of expression laws from 62 countries (722-item codebook); first author of the internal technical report; deployed the tool as a public Hugging Face Space.
- Coded laws into the Laws of Expression (LEX) dataset, built the project website (lawsofexpression.org), co-authored the cumulative report on expression laws, and first-authored a policy brief on Venezuela and El Salvador.
- Built a social media actor dataset of 630 elected officials across 5 platforms for Mexico's 2027 elections with multi-model AI agents; audited 1,600 accounts by hand (75–84% accuracy per platform).
- Co-authored a paper on judicial independence and expression rulings: merged three cross-national datasets and estimated multinomial logit models on 1,074 court decisions from 47 countries.

CEMEX **September 2024 - February 2025**

Data Science Intern *Monterrey, Mexico*

- Consolidated data from ERP systems and Excel spreadsheets into Snowflake SQL databases covering 65 concrete plants.
- Built internal dashboards of operational and sustainability metrics for plant managers and executives. Top dashboard grew from about 100 to 1,500+ monthly views.

Concordia University **June - September 2024**

Research Intern (Mitacs Globalink Scholar), with Dr. Elizabeth Bloodgood *Montreal, Quebec*

- Built an end-to-end pipeline using GPT models to extract and classify NGO regulations across 10 countries and 3 languages.

Continued as part-time remote research collaborator *2025 - present*

- Tested prompting strategies with GPT-4o and GPT-5 on 77 constitutional documents; reached 0.89–0.90 accuracy against expert coding (ARNOVA 2025, first author).
- Designed a two-stage GPT-5 workflow for coding civil society laws in 5 languages; a verification step raised evidence faithfulness from 69% to 95% at $0.60 per law (ISTR 2026, first author).

Ecological Committee of Nuevo León **January 2024 - June 2024**

Environmental Data Analyst, Volunteer *Monterrey, Mexico*

- Led a 3-person team calibrating air quality sensors against reference monitors with time-series regression ($R^2 > 0.95$).

Presentations

- Pérez Saucedo, R. A., Bloodgood, E. A., & DeMattee, A. J. (2026). Catching Up to Global NGO Regulatory Change: A Responsible AI Workflow for Comparative Legal Coding. *ISTR Conference.*
- Adams, E., Pérez, R., & DeMattee, A. J. (2026). Who Decides Matters: Judicial Independence, Executive Pressure, and the Limits of Legal Text in Expression Cases. *IPSA RC09 Workshop.*
- Pérez Saucedo, R. A., Morales, A., DeMattee, A. J., & Bloodgood, E. A. (2025). Large Language Models for Coding Comparative Law and Regulations. *ARNOVA Conference.*

Skills

Programming: Python (Pandas, NumPy, Statsmodels, Scikit-learn, TensorFlow), R, SQL, HTML, JavaScript.
Machine Learning/AI: Supervised and deep learning, NLP, model evaluation, prompt engineering, RAG, LLMs.
Statistics: Regression analysis, time series, hypothesis testing, A/B testing.
Data & Cloud: Snowflake, MongoDB, Microsoft Azure.
Tools: Git/GitHub, Docker, Flask, FastAPI, Codex, Claude Code.
